

Applicant: James G. Tribble  
Appl. No.: To be assigned  
(divisional of 10/053,793)

***Remarks***

Applicant has amended certain paragraphs of the Specification to correct typographical errors only. It is believed that these changes do not add any new matter.

In addition, Applicant presents claims 38-60 for consideration in this application, with claims 38 and 60 being the only independent claims. Due to the nature and timing of this preliminary amendment, prior to any substantive review by an Examiner, no amendment made was related to the statutory requirements of patentability unless expressly stated herein.

Prompt and favorable consideration of the claims presented above is respectfully requested.

Respectfully submitted,

STEPTOE & JOHNSON PLLC
